

## Research Directions for the Diabetes CCRE

**Are you a person with diabetes?**

**Then we would like to speak to YOU!**

The NHMRC Centre of Clinical Research Excellence in Clinical Science in Diabetes (Diabetes CCRE) is a clinical research centre at the University of Melbourne funded by the Australian government and involved in research into various aspects of type 1 and type 2 diabetes:

- *Diabetes management in general practice and primary care*
- *Complications including diabetic retinopathy, renal disease, cardiovascular disease*
- *Insulin pump technologies and continuous glucose monitoring*
- *Diet, nutrition and diabetes*
- *Population studies of diabetes*
- *Islet cell transplantation and associated issues*

The Diabetes CCRE will be holding information sessions about our work to inform people with type 1 and type 2 diabetes. We will then hold a focus group discussion when you will have the opportunity to give us your views about important diabetes research priorities.

**Sessions will be held on Saturday November 21, 2009 at:**  
Western District Health Service Education Centre  
Kitchener Street, Hamilton (Car park on Kitchener Street)

***Timetable:***

***Type 1 Diabetes: Saturday 21 Nov 1.30-3.30pm***

***Type 2 Diabetes: Saturday 21 Nov 4.00 – 6.00pm***

If you would like to participate, please contact Ayan Dasvarma

Telephone: (03) 9288 3646, Email: [adasvarma@medstv.unimelb.edu.au](mailto:adasvarma@medstv.unimelb.edu.au)

*You will be reimbursed for your participation in the focus group. Refreshments provided.*
